---

## Review Information

Field	Value
Review ID	FRR--
Review Date	//_____
Reviewer	
Firewall Name	
Firewall Platform	
Total Rules Reviewed	
Review Frequency	<input type="checkbox"/> Quarterly <input type="checkbox"/> Semi-Annual <input type="checkbox"/> Annual

---

## Per-Rule Review Checklist

For each rule, verify the following:

### Rule Identification

#	Rule Name/ID	Source	Destination	Service	Action	Last Hit Date
1						
2						
3						
4						
5						

---

## Rule Hygiene Checks

### 1. Unused Rules

Check	Status	Count	Action Required
Rules with zero hits in 90+ days	<input type="checkbox"/> Checked		
Rules with zero hits in 180+ days	<input type="checkbox"/> Checked		
Rules with zero hits in 365+ days	<input type="checkbox"/> Checked		
Disabled rules still in policy	<input type="checkbox"/> Checked		

**Recommendation:** Rules unused for 90+ days should be disabled. Rules unused for 180+ days should be removed.

## 2. Overly Permissive Rules

Check	Status	Count
Rules with "Any" as source	<input type="checkbox"/> Checked	
Rules with "Any" as destination	<input type="checkbox"/> Checked	
Rules with "Any" as service/port	<input type="checkbox"/> Checked	
Rules allowing "Any/Any/Any"	<input type="checkbox"/> Checked	
Rules with port ranges > 100 ports	<input type="checkbox"/> Checked	
Rules allowing all outbound traffic	<input type="checkbox"/> Checked	

## 3. Shadowed and Redundant Rules

Check	Status	Count
Rules shadowed by earlier rules (never matched)	<input type="checkbox"/> Checked	
Duplicate rules (identical source/dest/service)	<input type="checkbox"/> Checked	
Rules that can be consolidated into groups	<input type="checkbox"/> Checked	
Contradicting rules (allow + deny same traffic)	<input type="checkbox"/> Checked	

## 4. Compliance Checks

Check	Status	Notes
No rules allowing direct internet access to cardholder data (PCI 1.3)	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
Explicit deny-all at end of each zone pair (PCI 1.2.1)	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
No rules with "Any" service to DMZ (ISO 27001 A.13.1)	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
All management access restricted to jump hosts (CIS 9.2)	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
Logging enabled on all deny rules	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
Logging enabled on all cross-zone allow rules	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
Temporary rules within expiry date	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	

## 5. Documentation Checks

Check	Status	Notes
Every rule has a description/comment	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
Every rule links to a change request (FCR)	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
Rule owner is documented and still employed	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	

Business justification is still valid	<input type="checkbox"/> Pass <input type="checkbox"/> Fail	
---------------------------------------	---	--

## 6. Object/Group Hygiene

Check	Status	Count
Unused address objects	<input type="checkbox"/> Checked	
Unused service objects	<input type="checkbox"/> Checked	
Unused address groups	<input type="checkbox"/> Checked	
Objects with overlapping IPs	<input type="checkbox"/> Checked	
Objects with stale DNS entries	<input type="checkbox"/> Checked	

## Summary

Metric	Count
Total rules reviewed	
Rules to remove (unused)	
Rules to tighten (overly permissive)	
Rules to consolidate	
Shadowed rules found	
Compliance violations	
Undocumented rules	

## Risk Score

Rating	Criteria
<b>A (Excellent)</b>	0 compliance violations, <5% unused rules, all rules documented
<b>B (Good)</b>	0-2 compliance violations, <10% unused rules
<b>C (Needs Work)</b>	3-5 compliance violations, 10-20% unused rules
<b>D (Poor)</b>	5+ compliance violations, >20% unused rules, "Any/Any" rules present
<b>F (Critical)</b>	Active compliance violations, uncontrolled "Any/Any" rules, no documentation

This Review Grade: \_\_\_\_
